Perioperative Proces and Metromapping

CIBO surgery meeting September 8th 2023 Basel

Anita Heideveld-Chevalking, PhD Quality and Safety ORcomplex
Jan Hofland MD PhD, Cardio-Thoracic Anesthesiologist, Q&S
Marion van der Kolk MD PhD, Surgeon and Chair dept gastrointestinal and Oncologic Surgery

Facts and figures

2022

Patient care

total number of patients: 176.129

average hospitalization (in days): 5,9

• total number of hospital admissions: 22.220

• total number of unique patients: 17.539

• total number of clinical consults: 444.291

o new consults: 83.052

o control consults: 361,239

• total numer of surgeries: 30.590

• average duration surgery: 76 minutes

• average satisfaction rate patients: 8,7

Education and research

• students (total): 3.318

scientific publications: 3.945

dissertations: 195

Employees

• employees: 12.829

o female: 9.229

o male: 3.600

Environmental impact

Radboud university medical center

Our strategy person-centered and innovative

"Golden Rules at OR"

Based on the Dutch Perioperative Guideline

In cooperation with Panton - We design

find https://www.panton.nl

Know who the patient is

- ask for full name
- ask for date of birth
- check wristband and

medical file

Know time-out moments

professionals in charge ensure the correct implementation of the perioperative 'green wave' trajectory of time-out moments

Mark location and/or side

surgeon places an arrow indicating the location and/or side during the time-out, if applicable

Prevent hypothermia

- ear temperature between 35.5 - 37.5°C
- rectal temperature between 36 - 38 °C

Golden rules OR Part 2: This is how we work

Know time-out moments

ensure the correct

implementation of the

trajectory of time-out

Antibiotics prophylaxis

record the time of

CRM: safe together!

- ask for date of birth

- patients: specific information regarding efficient course of the
- planning: e.g. relief moments

- must be performed according to standard

Mark location and/or side

indicating the location and/or side during the time-out, if applicable

between 35.5 - 37.5°C rectal temperature hetween 36 - 38 °C

Caution using Propofol! Surgical materials

- hours from the time a new surines is filled
- dispose of residue from used syringe after start surgeon checks wound not used during procedure for

Double check

which the syringe was filled? Dispose after surgery

- use double initialing for

February, 2022

Radboudumc

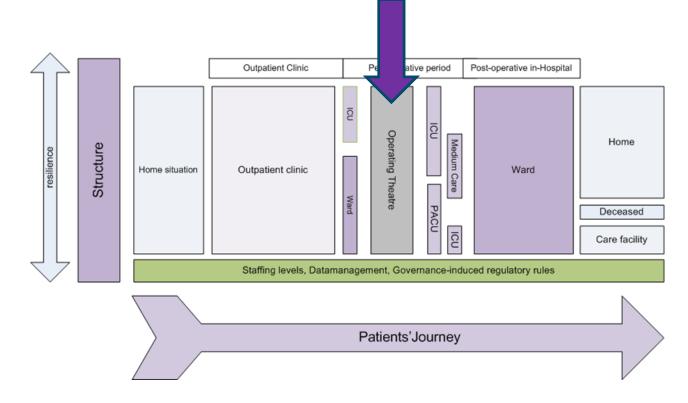

Surgical safest priorities 2023

- Equipment and Logistics
- Culture and Team Cooperation
- Perioperative process as shared resource in care pathways

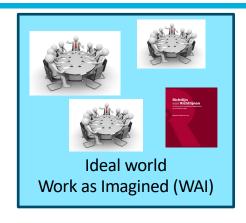

Radboudumc

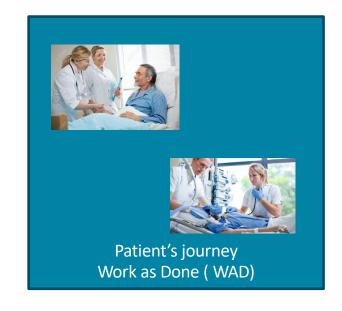

Patient journey through many Silos

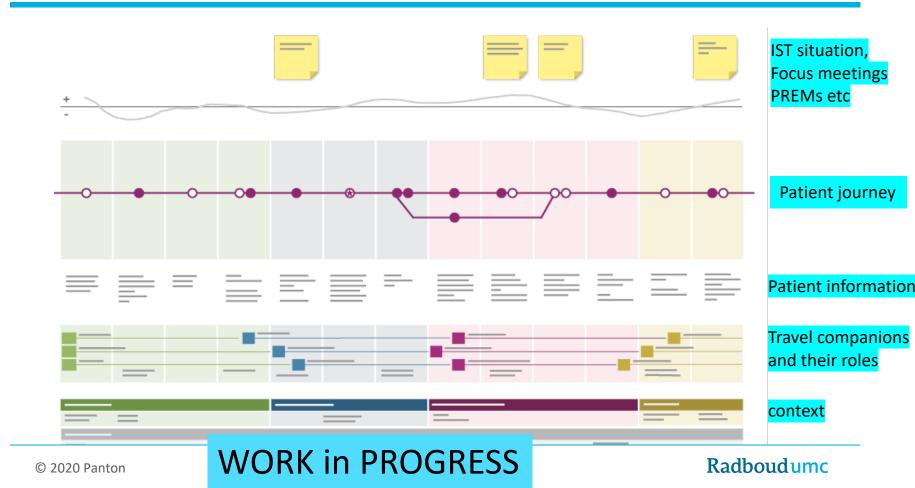

Healthcare

Information

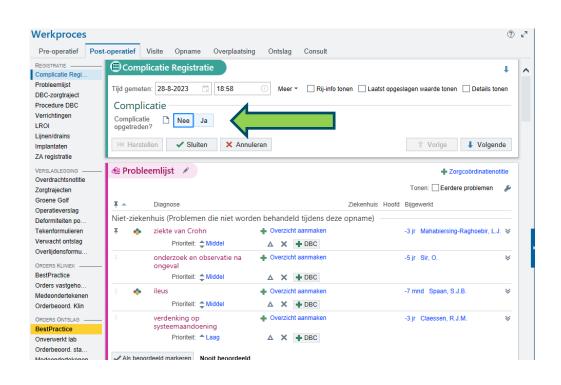

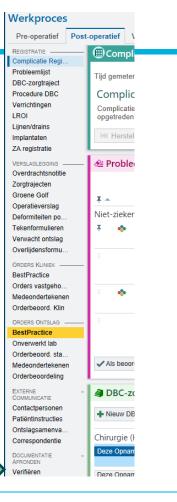

Value

Value stops where the "pain points" start

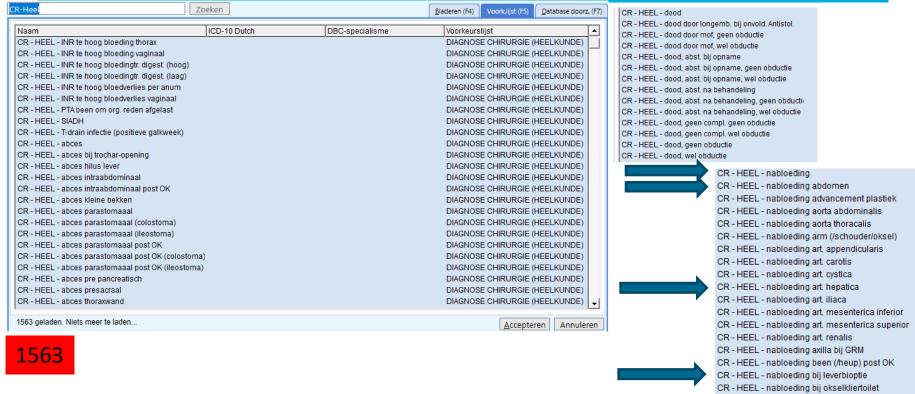

Examples:

- Dissatisfaction on patient level and health care professional level
- To much registration...
- Inclusiveness...
- Costs...

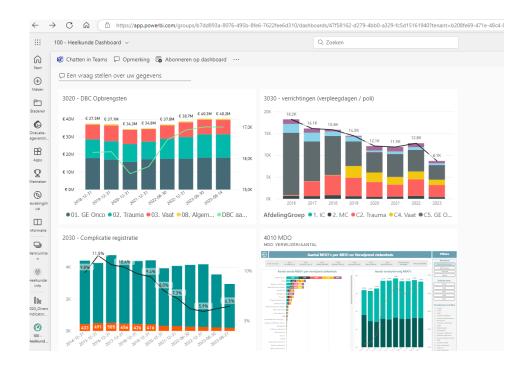

Complications in EPIC for Dept Surgery

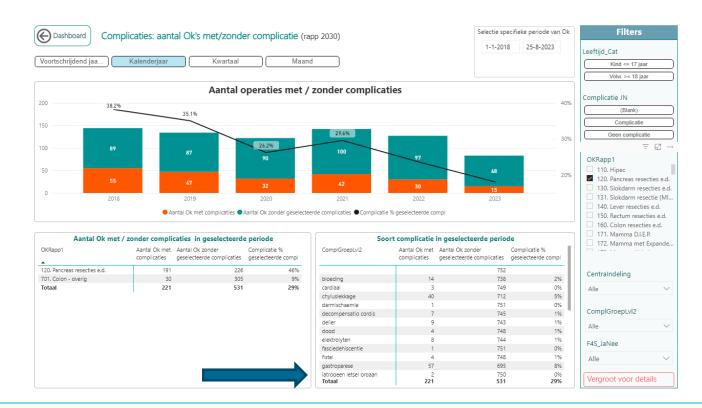

CR - HEEL - nabloeding hemorroidectomie

CR - HEEL - nabloeding halsword CR - HEEL - nabloeding hand

Power Bl too: 24/7 from EPIC Database (not from Data Warehouse)

Radboudumc

Intra operative complications

Working to improve patient safety along the journey before, during, and after surgery.

ClassIntra® for Better Outcomes in Surgery - CIBOSurg

Intraoperative registration Anesthesia

Allergic reaction [1180030]
Aspiration [89011]
Bleeding [1180160]
Non-planned IC-admission [89082]
Myocardial ischaemia [89018]
Other [1180280]
Bronchospasm [89009]
Conversion regional to general [11289037]
Accidentele dura puncture [89041]
High block [89039]
Skin damage / laceration / Skin rupture [89073]
Hypertension (>5 min diastole >110 or systole >180 mmHg) [11289020]
Hypotension (>5 min MAP <40 mmHg) [11289019]
Hypotension (>5 min MAP <40 mmHg) [11289019]
Hypotension (>5 min MAP <40 mmHg) [11289019]
Conversion regional to general [11289037]
Hypothermia (unintetritional central temperature <35.5) [11289003]
Hypoxaemia (saturation >5 min <85%) [11289016]
Laryngospasm [89010]
Damage after regional anesthesia [89046]
Medication error [11289050]
Unexpected difficult intunation [89003]
Unplanned re-intubation [89005]
Other [1180280]
Dead [89024]
Resuscitation [11289001]
Toothtrauma [89026]
Urinary retention (unwanted bladder contents > 700 ml) [11289002]

IN EPIC

Sign Out

PRE-CLOSURE SIGN-OUT

Operatiegebied is gecontroleerd op achtergebleven operatiemateriaal (gazen, naalden, instrumenten en overige materialen) vóór het sluiten van de wond

Controle compleetheid operatiematerialen (gazen, naalden, instrumenten en overige materialen) heeft plaatsgevonden vóór het sluiten van de wond

SIGN OUT

Van iedere discipline is iemand aanwezig voor de sign-out

Alle items van stopmomenten 4b en 4c zijn ingevuld in het EPD

Verloop van de operatie / interventie / anesthesie is besproken inclusief bijzonderheden

Eindcontrole compleetheid operatiematerialen (gazen, naalden, instrumenten en overige materialen) heeft plaatsgevonden

Postoperatief beleid is afgestemd en vastgelegd (inclusief overdrachtsnotitie en orders in het EPD)

Medicatie afspraken (bijvoorbeeld antibiotica, antistolling, pijnstilling) zijn afgestemd en vastgelegd

Controle juiste ordering en labeling patiëntenmateriaal heeft plaatsgevonden

LDA (lijnen, drains, airway) registratie heeft plaatsgevonden in de lijnen- en drainregistratie in het EPD

Implantaatregistratie heeft plaatsgevonden

Sign-out vond plaats

Eventuele problemen met apparatuur/ medische hulpmiddelen zijn geadresseerd

Teamwork en communicatie is besproken

Conclusie: Stopmoment 5 akkoord?

Ja Nee

Ja Nee

Nee NVT

Nee

We could add this.....

TABLE 1. ClassIntraversion 1.0 Classification of Intraoperative Adverse Events ¹⁵		
Grade	Definition	
Grade 0	No deviation from the ideal intraoperative course	
Grade I	Any deviation from the ideal intraoperative course:	
	 Without the need for any additional treatment or intervention 	
	Patient with no or mild symptoms	
Grade II	Any deviation from the ideal intraoperative course:	
	 With the need for any additional minor treatment or intervention 	
	 Patient with moderate symptoms, not life threatening, and not leading to permanent disability 	
Grade III	Any deviation from the ideal intraoperative course:	
	 With the need for any additional moderate treatment or intervention 	
	 Patient with severe symptoms, potentially life threatening or potentially leading to permanent disability 	
Grade IV	Any deviation from the ideal intraoperative course:	
	 With the need for any additional major and urgent treatment or intervention 	
	 Patient with life threatening symptoms or leading to permanent disability 	
Grade V	Any deviation from the ideal intraoperative course with intraoperative death of the patient	

Implementation

- Delphi rounds and Focusmeetings often with "usual suspects"
- Registration often ≠ protocol adherence
- Informal leaders, you need them
- Keep it simple, close to usual workaround
- Electronic Patient Data System must be useful and helpful

Thank You
